---

## Projects

Visit [github.com/jacksebastian17](https://github.com/jacksebastian17) for more projects

**Positive EV Sports Betting Algorithm** / [github.com/jacksebastian17/betting-algo](https://github.com/jacksebastian17/betting-algo)

- Self-developed a positive expected value (EV) sports betting tool that leverages web scraping to obtain odds from sportsbooks and calculates "edges" over the market to make a profit.
- Utilized Python, Selenium, Pandas.

**Harmonia** / [github.com/tamu-datathon-org/harmonia](https://github.com/tamu-datathon-org/harmonia)

- Discord OAuth2 Bot that connects a user's Discord accounts to their TAMU Datathon account.
- Utilized Next JS, React, Typescript, CSS.

---

## Organizations

**TAMU Datathon** / Vice President / College Station, TX

March 2021 – January 2023

- Leads a team of 21 students that host an annual hackathon that reaches over 1,000 students.
- Creating cutting edge web applications to increase engagement and insights from participants.

**Google Developer Student Club** / President / College Station, TX

June 2021 – May 2022

- Lead for Google's student-led organization that aims to promote/educate about Google technologies to the local community.
- Hosted events weekly to 100+ club members and helped build web applications to non-profits in the local area.
